

# TRANSFORMERS

TAILORED TO OUR CLIENTS' UNIQUE REQUIREMENTS

GT elektronik offers a wide range of power and safety isolating transformers, designed to grant the reliability, durability and efficiency required in industrial and commercial applications.

## EI/EE – Standard

- output power 0,35–210.00VA
- input voltage 230V

## UI – Standard

- output power 1,00–55.00VA
- input voltage 2x115V

## Linear

- user-specific solutions
- several fixing and connection possibilities

## Toroidal – Standard

- Flat design and low weight compared to traditional stacked lamination types
- 1,6–50VA
- Primary winding (115V or 230V @ 50/60Hz) with center taping for parallel or series connection
- Operating ambient temperature +60°C
- For easy assembly we offer M4 or M5 threads in the center (based on the VA)
- Our transformers meet UL 1950, VDE 61558-1; -2-6 and EN60950

## Toroidal – Custom

- user-specific solutions
- several fixing and connection possibilities
- individual sizes; 1,6–1000VA
- 0,35–210VA

*At GT we design, develop, produce and deliver transformers, chokes, coils and converters for medium-sized businesses and corporations, tailored to their unique requirements. How can we support you?*
